I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Treasure - Bruno Mars

While I don't like mainstream music in general, when I heard this song on the radio I was like, I MUST KNOW WHO MADE THIS.

Still, good time to reminisce on Euro discotheque.

This nation is now being retired.
Good-night, sweet prince.
