Elton John - Saturday Night's Alright for Fighting

When I was 10-12 I used to think Elton John was among the best things ever. Then I kinda forgot him and didn't listen to him at all until today (talking about 10+ year gap). I love this song but overall this album has been pretty weak.

Project Pitchfork - 2069 AD

**CVT Temp wrote:**  
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
