Today Is The Day - *There Is No End*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

The last song was...interesting. It had like a dancy beat to part of it.

This ones closer to what Secret Chiefs 3 has a lot of influence with.....which I never heard from this band before.

Naught by Stolen Babies in its entirety again. I think both my dad and I got used to some of the things we weren't so sure about with the band, because we were both intrigued enough by them to keep listening and now we both quite enjoy them.

Not really a fan of Skrillex anymore (Used to be when I first got into Dubstep but then realized how Skrillex was pretty generic in that realm), but that song worked really well in Far Cry 3.

However I don't mind Skrillex in this project. Not a huge fan of Korn but for some reason I found myself enjoying the metal Dubstep mix album they did.
