I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Fever Ray-Seven

4th time listening to this album....Really enjoy it

Oh, and an update on the Daft Punk album....I only liked about 3 songs out of the 13. Most of it was alright, not really bad, but 3 songs I quite enjoyed. Motherboard, Contact, and Giorgio by Moroder
