All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

everyone knows that quote, "I know not what weapons World War Three will be fought, but World War Four will be fought with sticks and stones," but in a way it's optimistic and inspiring because it suggests that even after destroying civilization and returning to the stone age we'll still be sufficiently globalized and bellicose to have another world war right then and there
