I'm kind of just grabbing random Porcupine Tree songs right now.

Porcupine Tree-Halo

[Show Spoiler](#)

If I recall correctly this song is supposed to be ironic or something.

Porcupine Tree-Strip The Soul

[Show Spoiler](#)

New York Times
Democracy

There are more lyrics but I don't really know them very well from here on.

This songs lyrics are pleasant.

Christian black metal can be good too. ☐

That's kind of hard to picture ☐

Rishloo-Blitz

I feel like listening to something I haven't heard before but I feel too lazy to do that tonight because I'm too tired.....

So I grab this. I want to go through all of Porcupine Tree that is on Spotify and Rishloo to grab lyrics for RP stuff, but I don't want to just like, sit here listening to music while doing nothing else, too....Eh, I should just get in bed already ☐

You smash to fucking bits your world when everything is alright~

You smash to fucking bits my world when everything is fine~

I know. I'm automatically suspicious of Christians in any music genre and expect it to be terribad. But I'm forced to admit this band is surprisingly skilled. It's a lot like Behemoth. I came in expecting the worst so I'd be lying if I said this isn't enjoyable bm. This is conflicting. :S

I did also find Drottnar, a technical black metal band I quite like which also happens to be Christian. It appears a person's religion doesn't influence their ability to make quality bm.

Melvins - Zzzz Best

I wonder how they come up with these song titles.

In other words — and this is the rock solid principle on which the whole of the Corporation's Galaxy-wide success is founded — their fundamental design flaws are completely hidden by their superficial design flaws.

Uhrilehto - *Musta Tie Tyhjyyteen*

CVT Temp wrote:
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
