Kal'Shazzar possesses a device called TASP (Targeted Amplification of Synaptic Pleasure) for delivering pleasure to any organic creature. I guess it fiddles with neuroceptors to suppress or promote the spread of certain neurotransmitters and, when repurposed, can deliver any sort of emotion.

Arcadia fought in World War II on the allied side against Japan. The "Pearl Harbour" in their timeline seems to have gone awry for the Japanese side because the Arcadians were able to repel them quite successfully. The Japs ended up surrendering a year earlier than it did in OTL.

The Empire is divided into eight primary administrative divisions (Commonwealths). I find it particularly weird that the rest of the world is *pretty much* the same as OTL borders. Maybe they just haven't gotten around to that yet?

The country in the modern era was first ruled as a brief democratic republic until it became a military junta which ruled from the mid 30s *until* the 50s. Then they restored the monarchy for some reason; revolutions tend to just restore democracy (look at the Greeks after the junta).

The Avant-Gardist State of Patagonia ~~~ *Gauchos and Mapuches, orgies and parties, avant-garde art, futurism, syndicalism, the New Man, general strikes, the glorification of violence, spiritual nationalism, esoteric occultism, CIA spooks, Spartanian homosexuality, public sodomy, and more*

Triomphe du Surréalisme (1968)

- There are many Surrealists about Patagonia but few actually know what goes on behind the Andes mountains. Tales of human depravation and man's inner darkest self run wild. A place where avant-garde culture flourish and the artist don't fear the censor. Where all live bold and free under the gaze of the Patron. Yet all dreams will come to an end soon...

Instead of a few dozen states or provinces, the country is divided into about 40,000 communes.

A fascist movement rose to power in Switzerland, considering the previous government to be too weak to stop incursions during and after WWI. It did not follow Nazi ideology but was friendly towards Nazi Germany.

That this nation's processors extensively use the virtual reality technologies provided by their MEUs, mostly for simulation purposes (recreation is minimized due to health concerns).
