A **chain** is a serial assembly of connected pieces, called links, typically made of metal, with an overall character similar to that of a rope in that it is flexible and curved in compression but linear, rigid, and load-bearing in tension. A chain may consist of two or more links. Chains can be classified by their design, which can be dictated by their use.

It's a long way to Mukumbura,
It's a long way to jawl.
It's a long way from your hometown,
But you can have yourselves a ball,
With your mukkas!

Goodbye, Bulawayo,
Tot siens, Cecil Square,
It's a long, long way to Mukumbura,
And we're going up there to stir!
