I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I can definitely see why this is considered Avant-Garde Metal and rock, even if it isn't blatantly Avant-Garde like something like Mr. Bungle, Igorrr, or Secret Chiefs 3.

Think I'm going to give Stolen Babies a try. They are one of those bands that some of the stuff I heard I'm kind of going "Ehhh" about but something about them still intrigues me to give them a more thorough listen. Including the dance rock song with screaming vocals. That was so weird it interested me.

[Stolen Babies-Second Sleep](#)

My dad told me that he's been mixed on them before but has liked some of their stuff, and he's the one who showed me this song.

The band appears to be experimental rock, progressive metal, Avant-Garde Metal, and Dance Rock....Interesting music.

Edit: I should totally put one of their dance rock songs on a playlist for a party so everyone can be like "The F?", and completely

understand that this is coming from Corrian who has had weird ideas to troll parties before.
