Leather Strip - *Leatherstrip Part I*

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Mindblown, it's Otin Viskin Ja Helvetti Repes, translates to "I Took a
Whiskey and Hell Broke Loose"

I hear the "they sold out with this new progressive *rock* shit" more than anything. At least Deliverance is still death metal ☐

I'm still on the same song so I can't add anything more.

I only really like Blackwater Park. Wasn't big fan of Still Life and with those prog rock albums I tend to think: "Why should I listen to this shit when I can listen to *real*/prog rock?" Aka Yes, Rush, King Crimson etc.
