I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Probably my favorite song by them.....which of course is probably their darkest song. But one of their favorites of mine is one of their happiest songs, too, so yeah...

Maralyn Manson: Coma White

I'm not usually into rock or metal, but I've definitely picked up a taste for this band.

It started with the Resident Evil movie.

My nation is called Veyla, Veyliss is its' patron Goddess, Call me... Mati (greek for eye)
