Cat then eats the Man.

Man wakes up once again, doctor asks: "Do you know who you are?"

Man: "Yes, I do."

Doctor: "Then you probably know what this thing is.", pointing to C205 Time Displacement Unit.

Man: "I don't, I'm just a simple man. How am I supposed to know what this chunk of metal is?"

Doctor: "It happened to be near you when we found your body, If you don't actually know what that is, I guess I will have to call an expert in that case."

Man: "Do as you please, doctor."

The expert turned out to be the original man, he has a bullet wound in his temple, man gets frightened then runs out of the hospital, he runs into a wall, the doctor was the man who invented the mpc and the new man's conciseness into a computer which was stored, the doctor and the expert then got transferred into the computer, the C205 then glitched and the world crumpled again, man wakes up in his bed
