The "Mighty Mo" is an *Iowa*-class battleship built for the United States Navy during World War II.

She is particularly notable for being chosen by General Douglas MacArthur for the Japanese surrender ceremony at the end of the war. She earned three battle stars during World War II, gained another five during the Korean War, and then was decommissioned in 1955 for over 30 years before her refit and brief six-year recommissioning in 1986. She is now preserved as a museum ship.

How many planes could a Bofors down if a Bofors could down planes?

I don't know why, but **Buhers Mk II** came to mind.
