Yes, it is infused into the ELP songs at various points. It is a "Concept Album," which were popular with maany bands in the early 1970s. Also, Russian myths such as Baba Yaga are layered in as well. BTW, it is a live album.

A live concept album. Interesting.

If you appreciate classical music as well as prog rock, give it a listen, you will not be wasting your time at all. ☐

Katatonia - *Criminals*

Swedish melancholic gothic/progressive doom rock. From the album **Viva Emptiness**, released in 2003 by Peaceville Records.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
