Man explodes, and promptly dies in the following blast. Becoming a shadow figure. (Seen in the aftermath of Nagasaki and Hiroshima. - There would be shadows in instances where people once stood.)

Pterodactyl sees it is being stared at by multiple scientist in white lad coats. One of the scientist attempts to talk to it.

tutto è possibile, Entro i limiti della scienza

In Italian it means

Anything is possible, within our limitations

Or at least i hope that's what it means since these days you can't trust google translate. For all I know I could be saying "Your mother was a hamster and your father smelt of elderberries!" PS: If you get that reference then you are very cultured.
