Best Night by Justice Crew. Awesome song

MT. Don't really care about military stuff, although concealed carry laws have given us a new fondness for compact weapons. Unhealthy national obsession with cars. Annoyingly huge cancer problem.

Her Name Is Calla-The Union: Recidivist

While this whole band is great, some songs, like this one, are absolutely fantastic.

Explosions In The Sky - *Memorial*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
