No not the switch one the PC one. I have it on steam along with mods. I have seen it's better to play it on keyboard than on the game pad it's also harder than Project Diva 2nd on PS3 and I played it the difference is colossal in difficulty. Though I can play Sekirranun Graffiti on hard on the PC version with around a B rating I think.

Yeah keyboard really is better for it. It's definitely one of the hardest entries especially for me since I'm not even much of a rhythm game person other than project diva and sekai /skip

I was late again, but alas I can ascend knowing that NS stats got the ultimate treatment. Now I can rest. Also Yosuya is not next unfortunately to take the bet.

Yosuya would you like to comment on the proposed bet?
