I felt this album was a little disappointing, really. It could have done without the vocals.

Bjork - I Miss You

This is the first album by him I'm fully listening through.

I like the vocals, probably because the vocals are by one of my favorite singers, from Agent Fresco.

I would say that some of the other stuff I've briefly heard by Olafur Arnalds is more interesting, though.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
