Man enters a time machine and ends up in a remote cave in the Altai in 2029, where the new republic of Tannu Tuva is preparing for war against the PLA Xinjiang. It may seem like they have no chance since the PLA Xinjiang outnumbers their entire population (about 50,000), but they stole the Stancija Almaz from Putin in 2023 and have many secret technologies that aren't known to any UN-recognized nation. Most of the world is at war, with Chinese forces having recently overrun Pyeongyang and now in a stalemate within Seoul against Korean and Japanese forces. Casualties are at 32 million and still counting.

N-Day arrives, but it's 1972, and Man is Prisencolinensinainciusol-rolled. Wrong Adrian, and the Latin Man learned was actually modern Italian.

Man is crushed by yet another satellite. Perhaps this is God's way of telling Man that mixing pineapple and pizza<sup>1</sup> is a crime that should be sentenced to death?

<sup>1</sup> Apparently it said pasta and not pizza, just goes to show how strong my hatred of Pineapple & Pizza is, **I went blind with furious anger**. Apologies Pikachu Peoples.

New Man!
