The Beatles - The End

From: Abbey Road (1969)
Genre: Hard rock, art rock, heavy metal

One of my favourite Beatles songs.

WRTX - Headshot Without a Bullet

*Your life fade away and your mind will fall insane
My hands are so cold and your eyes are full of fear
So this is...*

*Headshot without a bullet
Death pain violence
Headshot without a bullet*

*Headshot, headshot, headshot without a bullet
Headshot, headshot, headshot without a bullet
There is no evidence*

Death/thrash metal from their 2006 demo Unbeknowst to Us.

I agree with the second definition:

“

A fake metal genre that wants to fool people into thinking Brutal Death Metal is called "Slam Metal". Ignorant fools use the term "Slam Metal" to describe a wide variety of well established genres, for example: Goregrind, Brutal Death Metal and Deathgrind

KIN - *Passing Car*

CVT Temp wrote:
I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
