### Ghost - "*Deus in Absentia*"

Heavy Metal/Rock from the album "Meliora" (2015)

First time listening to this band in over a year... they were one of the first Metal bands my friend introduced me to, but for some reason I stopped listening to them. Anyway I am glad I decided to listen to them again because this is a really sweet album. ☐

Candlemass - Julie Laughs No More

*Nothing really matters anymore  
No Julie longer knocks on the door  
A fallen princess bends her head in shame  
In the end there's no one else to blame*

*And she's falling  
Falling without reach  
Julie's falling, a little girl lost in her dreams  
Afraid to go, afraid to live  
Into the emptiness what there's to believe*

Iced Earth - Angel's Holocaust

*Fear the angels holocaust, they're screaming  
Dreams of pain forever entering your head  
Death and hatred loathing, on mankind it feeds  
Earth is dead and gone now, we've brought it to an end*

*For the last time I've been betrayed  
Never again will I subject myself to this hypocrisy  
Something is drawing me to the other side  
Only time will tell my true destiny*

Gorefest - Mental Misery

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
