If I ever wasn't lazy about NS worldbuilding I could probably flesh out my leader character more. I have the core of what I want her to be but there's probably more that can be fleshed out to make her actually seem like the leader of a flawed democracy. I.e. corruption scandals and ordering arbitrary arrests.

Yeah. This is the reason I don't really like leaders with OP powers like teleportation, telekinesis, whatever.

According to my understanding, that's everything that's happening, and some members of that alliance are leaving.

There was GRAIL, which became New GRAIL after ES got DOS'd, which died off and formed SETA, which I helped kill and cause the splinter cells of CATO (conservative), CITA (centrists), and LITA (liberals). I helped take out CATO and CITA by convincing Rom and Langenia respectively that they were better than this. LITA stayed around and then IDSF or whatever it's called came around, and by that point I was just like "fuckit, i can't stop it" and then a few other ones got made and then died...

My current leader DEFINITELY isn't "Chairman Xi"-ing all over my current political status quo, not at all...

I *do* have some major story beats worked out for my leader in my headcanon, but not so much as a real name (eventually I'll work more on my conlang, and get a naming structure up and running).

**Aureumterra III wrote:**

Personally I feel like this sort of thing is underappreciated by nations that are republics or generally non-monarchical. While the personal dynamics of a cabinet can be overemphasized in some media, it's also never quite so dull as "the boring politicians did their boring tasks and never ever got into a heated ego- or ideologically-driven disagreement over anything, and [number] years later they were all reelected so as to continue being unremarkable in every way."

Did any of your cabinet members get to their positions through nepotism? Did any of them served in previous administrations, being used to different management styles? How many of them are personally friends or enemies with one another? Have any of them screwed each other over on a past campaign trail? What happens when your fresh-faced elected official runs headlong into a oppositional bureaucrat from a long time ago and a galaxy far far away? The possibilities are really endless, and these complications to boring political concerns are easily the most interesting thing about fictional and historical politics, at least to me.
