Ophthalmia - *Ophthalmia/The Eternal Walk (Part III)*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I have been testing myself and I have finally found out that I am weird.

I play *Gohan Fights Frieza* all the time I am here.  
And I am here for 10 hours a day minimum.

I have a severe case of addiction to writing. At least 3k words every day is my fix.
