I'm not bashing his music, but he's an egotistical asshole, and I see
no way to argue against that. He may be talented (Or at least better
then a lot of the more popular hip-hop), but he still comes off as
having an extremely huge ego and a jerk.

I've actually liked a bit of what I've heard of his stuff, which isn't
much, just because it doesn't sound like everything else.

Calling yourself the "King of Rock", or however he worded it, and the
new Jimi Hendrix is dumb in my opinion. Especially when you're not
rock.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
