This is what matters tbh.

THE PEOPLE * ETERNAL

" We will not bow to your dictation. We are free. We bled to be free.
Who are you to tell us what we may and may not do? **We stopped being your slaves an era ago.** "

South Reinkalistan is a massive, ecologically-diverse nation notable for its roving student militias and widespread hatred for the elderly. In the midst of a room-temperature cultural revolution that's lost its momentum, the Party carefully plans its next move. As the brittle bones of fragile empires begin to crack beneath their own weight, history's symphony reaches crescendo pitch. The future is all but certain.

This is what matters tbh.

I reserve the goddamn right to bring up my week-long research into how one launches a SS-1b "Scud-B" tactical ballistic missile (which, unfortunately, yielded no results whatsoever) whenever I damn please.

Shame there isn't just a manual...

Sophia in England wrote:

To be fair, have you seen Kowani's posts? They actually write quality length, well cited replies most of the time. (Of course, Kowani is one of the few NSG posters who actually does this instead of sprouting flarrebait willy-nilly, but...)

[Kowani](#)

Just because you do your research and make effortposts doesn't mean you're right. It doesn't mean your solution is right. It doesn't mean people won't think you're an asshole. It doesn't mean that people are going to believe you any more that they already do. It doesn't mean people automatically will agree with you. It doesn't mean people will just nod their head and say "that's well written, I'm going to believe that." And besides, for every one of Kowani's effortposts, how many low-effort posts are made? A hundred?

I wasn't talking about the correctness of their posts, but rather his effort. Whether or not you agree with their facts is irrelevant here. You claimed that NSG posters don't effortpost much, and my response was that there are committed effortposter with a good rate of using well thought out replies, even if it's extremely difficult to do in the NSG environment.

All I know is that the process takes like an hour for some reason. Give me a screwdriver, some duct tape, and a copy of Wikipedia and I'll have it down to five minutes flat.

This is, of course, coming off the tails of

- that time I researched emotional manipulation so I could guilt-trip GRAIL/SETA/CATO/whateverthelltheotheroneswerecalled into dissolving... and it worked
- that time I read the entire OSHA Small Business handbook front-to-back *twice in a row*
- that time I literally read about every single AK variant ever produced, foreign or domestic
- that time I spent a literal hour researching the UB-32 because its Wikipedia page is shit
- and last but not least, the time I watched Top Gun three times in a row back-to-back without stopping

Come at me.
