I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

True, just put that on and sent some snapchats to a friend of mine. He is annoyed by that band and that song in particular.

Tortoise-Benway

I dunno why the 3 newest albums by Tortoise are considered their least popular (Beyond the first 2 before their most highly received albums). I think they're all pretty good and unique, and possibly better than the actual highly praised stuff.
