Prodigy - *Thunder*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Far Cry 3 Soundtrack-Call of the Wild

Being reminded of how weird this soundtrack is for the atmosphere. One reason why I ended up really kind of digging this soundtrack is because suddenly getting wub wubs while I'm in the freaking jungle and all sorts of weird electronic music was very WTF-worthy, and it was such a weird clash of stuff but they made it work so perfectly.
