Zedashe - *Chakrulo*

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Thought because of the music that this popular band was from the Dominican Republic or Puerto Rico in the Caribbean but found out that they are from Argentina. Who would have guessed since this genre of music is native to the Caribbean not Argentina.

Now this is a song made for dancing.

Banda XXI - In translation the Songs title would be "Pass me the Bottle".
