All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Eh...that Cougar album was okay. Not that exciting overall.

Once I'm done adding all of these bands, I might end up eliminating some I'll probably never really listen to to make my playlists more...clean. Because there's a lot of decent post-rock bands and such on these lists that I'll probably never really listen to again.
