I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Genius/GZA - Liquid Swords (ft. RZA)

*When I was little, my father was famous  
He was the greatest samurai in the empire  
And he was the Shogun's decapitator  
He cut off the heads of a hundred and thirty-one lords  
It was a bad time for the empire  
The Shogun just stayed inside his castle and he never came out  
People said his brain was infected by devils  
My father would come home, he would forget about the killings  
He wasn't scared of the Shogun, but the Shogun was scared of him  
Maybe that was the problem  
Then, one night, the Shogun sent his ninja spies to our house  
They were supposed to kill my father,s but they didn't  
That was the night everything changed....*

Liquid Swords, masterpiece.
