Cynic - How Could I

CVT Temp wrote:

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

🗨 **Monlyth wrote:**

Haven't tuned in to any pop music radio station for about four months, but when I did, the beat of the song was usually loud or catchy enough to overlook the lack of awe from the lyrics. This one, though, was surprisingly weak in seemingly every aspect, especially considering it was by Selena Gomez, whose songs prior to this one have held some redeemable quality, at least to me.

Agreed. I can overlook the quality of the lyrics if the beat is good enough, and I was actually excited to hear that Selena was coming out with a new song. Listening to some of her other stuff, my expectations were high for this one. Unfortunately, like you said, the song is surprisingly weak. ☐

["Weed and Hennessy" - Mavado](#)

Nice chill music. ☐

This is no longer my main nation (got bored with it).
