All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

You made us go off on a random chat about Emo styles and music with your hot topic generalization.

Death Cab for Cutie-Home is a Fire

That wasn't nice at all for them to be calling people who shop at Hot Topic, "Emo scenetards." Hot Topic carries certain types of clothing not easily available elsewhere. It's often easier for people to go a local Hot Topic and purchase what they want there instead of ordering it, or searching around at other stores when Hot Topic specifically caters to them. Am I a better person than Hot Topic shoppers because I'm forced to order my favourite clothes online due to no such stores being near me? It's pathetic to ridicule people for where they shop at, and certainly says a lot about the person doing the ridiculing.

One of the upcoming Sainkho Namtchylak albums is 21 songs long, and 7 of them are over 10 minutes long

It is a 3 CD album.

I need a break from her, though.

Michael Gira-Jim

Speaking of crazy song lengths. My Philip Glass playlist has 124 songs and it's 8 hours long (Not sure if I care to go through all of his stuff), and this Klaus Schulze which I heard one song of and liked has 193 on Spotify and it is 42 hours long
