Orphaned Land - *My Requiem*

**CVT Temp wrote:**

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

The Beatles cover?

The Beatles- The Long And Winding Road  
(Btw, remember our conversation about impressive song names? This could be one. )

That song name does give a good impression of, I dunno, a long, grueling life. Or a long fight with depression, or whatever. That's at least what popped into my mind.

And names like this....

More dancy {heard their most recent album goes even more down this realm}, but different then your typical generic dance-type of music. This band seems to have quite the variety.
