"Oh, hello there sir! Is it okay if I call you 'fat bastard'? That's fine, I'll do it anyway. If I were to attempt to speak your entire name, I cannot be guaranteed that you would be able to survive... I'd wager it'd be a heart attack that deals the death card on you. In any event, I must commend you on your most steadfast of determination to see your will done, but that would be rather specifically where the accolades end. I wish you well in future endeavors, and may your times be interesting indeed." -[Kaz'Ramael](#)

"Cool cane! I like this guy, he seems nice and polite. Though his outlook is a bit sour and could do with some much needed uplifting. And, what's with the hatred of bats? Not cool. He seems to be a pretty good leader, but his embrace of capitalist rot will surely lead to misery and strife. Overall, I would say we could get along, I love his constant smile, but is it genuine?" ~ Premier Joyberry

"Ms. Joyberry, I certainly hope you have no intents on exporting your little social engineering experiment. If anything, I personally suspect it will become a localized warning over the entirely un-natural nature of socialism. *"Another hybrid aberration. Their number of unsettling. But of this specific breed, I find a strange combination. Some of her traits, separated from her nature, seem admirable, the kind of productive perseverance that situations like ours demand. Yet she serves as the sycophant of a royal. Perhaps befitting a being so reminiscent of a pet of old, but nonetheless shining a light of timidity upon her, in contrast to the brash aggression some incidents unveil. Rumours proclaim her role is larger than it may appear, but I find rumours unreliable and cannot say how accurate they are in this case. Whatever her true power, there are other rumours I hope are untrue. If these unidentified objects are a threat, they must be dealt with before a calamity is unleashed. On the so-called Shadow Queen, I offer little but observations."*

I can see you've done the best you can manage amongst your people, and in your shoes I doubt it would be possible to act any other way. We could assist you, if you'd like. [Tsi. Marlie Nova Radiant Lapia Starlight:](#) Funny you said that. Remember what you said to me long ago? And I quote: *It's okay, nobody here is crazy. We're all here together as friends. And in the name of such friendship, and our bountiful future, I declare a feast shall be thrown!* Hmph, people can change. Sometimes for the better, sometimes for the worse. And that is perhaps why I have learned not to trust someone completely.

Captcha stomped on by Valentijn, then lasered by Clarissa, snapped out of existence by Gwen, only to be brought back by Jolyn to shoot it 16 times.

"He disliked us, but when it came to fightin' aid, he made a right choice. Sometimes, the concept of the enemy of my enemy is my friend really works. Now, when do we charge and strike at those ISIS terrorists? Me and my two warbands are ready to strike and we are getting antsy! And not only that, but he also looks good in a formal wear. Unlike me... Last time, I wore the upscale outfit... despite it perfectly fitting me, I still looked ridiculous and out of place. Which is why I wear either metalhead-ish outfit or combinte it with battle armor, which looks a lil' bit post apocalypse. Unless, some event I go to, requires something more upscale and there is no way around it."-Shawn Bjomson

"A peaceful spirit in a spiritual garden. Even with our most developed technologies, Technocrat dan can produce, she is still something more of a spirit, than a scientifically explainable wonder. At least to me, because I actually never learned advanced physics. I can only assume, that since she can harness "limitless" amount of the energy from her dimension, this dimension is actually her body. She is an extremely large, sapient shapeless being, that can assume any shape (even of a hive mind of sentinet beings) and somehow even split. And I still have doubts, that she has limitless energy, after all, there are laws, such as  $E = mc^2$  and thermodynamics, that say, that there ain't no such thing as limitless energy. She might acutally have a limited, but extremely large pool of energy. But what about solid light? How the heck does it even work? This thing is a peaceful and adorable enigma, that hides countless discoveries far beyond our comprehension. At least at our technological level.

What? A warrior can't try to thing about science? Life is not only about delinquency and fighting after all..."-Shawn Bjomson
