Monkey 1732 invented a time machine trying to stop Monkey 642 from causing a nuclear plant meltdown, but died in the process and only further aggravated the meltdown.

Monkey 1731 pointed out that Monkey 642 would most likely not cause a nuclear meltdown, and shot himself after overthinking everything.

Monkey 1729 heard gold was edible, and tried to eat Monkey 1730's remains. He learned the hard way that you still have to chew gold before swallowing it.

Jebslund is a nation of kerbals ruled by Emperor Jebediah Kerman. We reject tyranny, believing that rights should be protected, though we also believe said rights end where the rights of others begin. Shockingly, we *do* use NS stats, with the exception of lifespan.

Monkey 1728 is made of potassium. He got water dumped on him and reacted accordingly (aka combusting).
