You want incredible music discussions? You should have told us earlier, since there is a thread for that purpose.

I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

No, I know what I'm getting out of this thread, I don't get what [I]you're[\I] trying to get out of it. People are posting what they're listening to, right? And what's wrong with a harmless, if unfunny, joke? Whatever dude
