All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

It's not his best song, but it's good enough you shouldn't have to ask people not to judge you. His success has made him a punchline, rather unfairly, but he's a successful artist for a reason.
