> I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Mojave 3 - Writing To St Peter

Spoon And Rafter is one of the most beautiful albums I have ever listened to. It reminds me of long drives with my best friends out to the middle of nowhere late at night.

I wanna take you
Take you way down
To my favorite place in town
