After listening to that EP, I'm in a Deftones mood for some reason.

Rakim – Guess Who's Back (Alternate Mix)

9/10. Better than I expected it to be.

Deftones-Back to School

I remember digging this song when I was like...10...Maybe younger, before I really got into Deftones. Now it might be my least favorite song on this album...

I knew another Deftones song that my dad showed me from a long time ago, too, which is what started me on listening to them in the first place.

All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
