> I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Munly and the Lee Lewis Harlots-Big Black Bull Comes Like a Caesar

I keep finding myself coming back to this guy despite the fact the
vocals aren't really something I would think I could listen to that
often. Apparently that's not the case.

Mind you, I do come back to this one specific song, but still.

I forced myself onto my brother~
