All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I dreamed about coyotes breaking into our fenced in back yard while I was sleeping out there with no tent...

...I also dreamed about eating oatmeal.

When you're sleeping in bursts (Slept better last night but still woke up a lot), you get weird dreams...

Major partner in free association with Faraby (that's my puppet/secondary nation IRL).

Factbook

Impossible is just a big word thrown around by small men who find it easier to live in the world they've been given than to explore the power they have to change it. Impossible is not a fact. It's an opinion. Impossible is not a declaration. It's a dare. Impossible is potential. Impossible is temporary. Impossible is nothing.
