Recent Political Compass Results
'Twas brillig, and the slithy toves;
Did gyre and gimble in the wabe;
All mimsy were the borogoves,
And the mome raths outgrabe.

All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.
