> I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

^How many songs does Spear of Destiny have? I think 1 song is quite sufficient for this thread. You don't need to post every single song.

There are eleven songs on the album, but I didn't start with the first song. And quite frankly, there are actually no rules against posting every single song of an album, as long as you're listening to it.

Spear Of Destiny - *Crowley*

And don't worry, it's the last track on the cd.
