> I mean, we can actually create a mathematical definition for evolution in terms of the evolutionary algorithm and then write code to deal with abstract instances of evolution, which basically equates to mathematical proof that evolution works. All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

I just recently discovered them on Pandora. If I hadn't used Emilie
Autumn as an artist seed, I'd probably still be missing out on their
greatness.

I won't patronise you with a wise quote.

For: Islam, Quasi Capitalism/Socialism, fair job allocations, moral modesty, Palestine, sensible patriarchy
Against: Pointless reveling, mass drinking of alcohol, United States led invasions, Iraq war, excessive pride, excessive SME business rates, postcode neglect, busy lifestyles
