All that remains is to show that biological systems replicate in such a way as to satisfy the minimal criteria required for evolution to apply to them, something which has already been adequately shown time and again. At this point, we've pretty much proven that not only can evolution happen, it pretty much must happen since it's basically impossible to prevent it from happening.

Sigur Rós-Brennisteinn

They put out a music video and the full length single today, and also announced their new album for a June release. Sounds pretty great in my opinion, and the video is great too. Sigur Ros has always had good visual in their music videos. I think this is the most I've ever actually seen the band in a music video of theirs.
